1. Product Description

The product is outdoor rental of KMT EH1.56-PRO series, this product adopts COB encapsulation technology, which is different from the traditional SMD surface-mount encapsulation. It integrates the light-emitting RGB chip on the PCB board instead of soldering LED lamp to the PCB one by one. This technology effectively improves the reliability, light color and protection performance of LED display. The standard cabinet size is 500mm*500mm .

With up to 3840Hz refresh frequencyOptional with radian locks and can achieve arc splicing. The die casting cabinet with anodic oxidation which is resistant to collision and friction, it's suitable for multiple set up and disassembly in the leasing process.

1.1 Application Scope

This technical specification is just applicable to KMT outdoor COB series product. Module size:250*250mm and its die cast aluminum cabinet size is: 500*500mm.

1.2 Product Features

- Standardized 500mm*500mm die-casting aluminum cabinet, module adopts die-casting aluminum bottom shell, higher screen splicing flatness;
- Flip chip COB technology , low consumption, and more stable;
- Hard-wired power box, no wiring, more beautiful;
- The up and down connect with the big magnetic screw,within automatic suction function;
- Optional right-angle splicing to satisfy a variety of rental scenarios;
- Big high-quality chip, pure gold bonding wires , and pads are immersed gold technology, which is more reliable ;
- Flip Chip COB with common cathode solution , excellent heat dissipation and low light decay.
